s.chintawar@somaiya.edu · [github](#) · [LinkedIn](#)

OBJECTIVE

I'm in my second year of study for a degree in Computer and Communication Engineering, which I complement with skills in full-stack web development and logical problem-solving. My abilities include HTML, CSS, JavaScript, and React along with Tailwind CSS for the front-end, while I use Python, C, and Java for the backend as well as in algorithmic and logical puzzles.

As for now, I am working on the more practical side of AI and web technologies and have learned to use Firebase, REST APIs, and AI/ML models. Along with that, I am also learning backend development with Node.js, Express, and MongoDB to create scalable full-stack applications.

Outside of my engineering competencies, I take part in various activities of my school and hold leadership positions which have developed my communication, project management, and teamwork skills. I am regarded as someone who learns quickly and is readily adaptable, which enables me to take advantage of new concepts and technologies regardless of the pace within which they are presented.

Programming Languages: JavaScript, Python, C Programming, Web Development ,React.js , Firebase , Java ,
AWS , kubernetes

TechnicalSkills: Speaking, Writing, Networking & Communication, Adobe Suite, Canva, MS Office

Fluency : English, Hindi, Marathi

EXPERIENCE

DeepCheck.a

- Built a fully functional landing page for my project in hackathon , a deepfake video detector

DataZen

- Designed and developed the front-end of DataZen's official website using HTML, CSS, JavaScript, and React, ensuring a responsive and user-friendly interface.
- Collaborated with team members to implement dynamic features and optimize the website for better performance and accessibility.

PROJECTS , INTERNSHIPS

Deepfake Analysis System

- Description: Developed a frontend website and contributed to deepfake analysis model to detect manipulated media.
- Tech Stack: TensorFlow, PyTorch, React, HTML, CSS.
- Key Features:
 - Built a multi-responsive frontend interface for seamless user interaction.
 - Implemented key frame analysis and metadata analysis for deepfake detection.
 - Utilised LSTM (Long Short-Term Memory) networks for temporal pattern recognition in videos.
 - Delivered high accuracy in identifying deepfake videos, enhancing user trust.

Areva Logistics Website

May 2024 - June 2024

- Description: Designed and developed a multi-responsive frontend website for a logistics company.
- Tech Stack: HTML, CSS, JavaScript.
- Key Features:
 - Created a clean and user-friendly design to optimize the user experience across devices.
 - Implemented responsive design techniques to ensure compatibility with mobile, tablet, and desktop platforms.
 - Collaborated with stakeholders to understand business requirements and deliver tailored solutions.

Fibotalk

Dec 2024 - Feb 2025

- Engineered a fault-tolerant, high-throughput pipeline processing millions of events hourly on AWS using Spark, Kafka, Redis, and Lambda, achieving 99.99% uptime.
- Developed a test generation tool increasing test coverage by 40% through random XML doc creation from XML Schema.
 - Contributed to migrating 5 critical microservices to Kubernetes, simplifying service isolation and scaling for a 3x increase in traffic handling.

Servease.ai

- AI/ML Engineer – Secure Banking Web App
- React · Python · Firebase · Whisper · spaCy · Hugging Face Transformers · FaceIO
- Developed NLP pipeline using spaCy and Hugging Face Transformers for query intent detection, sentiment analysis, and priority classification.
- Integrated Whisper for real-time speech-to-text transcription of voice-based support queries.
- Automated ticket triaging and escalation based on urgency and topic relevance.
- Contributed backend logic via Firebase Cloud Functions and Firestore, exposing AI services through secure APIs.
- Enabled biometric login using FaceIO and aligned AI outputs with frontend flows.

Coursework

- Mathematics & Logic: Applied Mathematics, Discrete Mathematics , Linear Algebra
- Computer Science: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Analysis of Algorithms (AOA)
- Systems & Architecture: Digital Systems, Computer Organization, Microprocessors & Microcontrollers
- Electrical Engineering: Electrical Circuits & Analysis , Signals and systems , radio frequency analysis
- Web Development: Frontend Development, Responsive Design , Backend (firebase , mysql , mongoDB)

Hackathon , Extracurricular

- **IDEA Hackathon 2025**
participated in the IDEA hackathon conducted by the Union Bank Of India
- **PR and Marketing Member Datazen**
Helped in the PR and the Marketing of the events conducted by the Council Datazen official data science council of Somaiya Vidyavihar University , got sponsors like Max Protein , Bounce for our national level hackathon with over 1200+ registration and 150+ participants

University

- Bachelors Of Technology in Computer and Communication Engineering
KJ somaiya School of Engineering
Pointer - 8.39 (average till 3rd semester)
